Engineering Management

The Bachelor of Science program in Engineering Management consists of a minimum of 120 units of academic work and (except for exempt foreign students) a minimum of 32 units of Cooperative Education credit. This program is designed to provide flexibility to students. Students take a full year of upper division engineering courses and then specialize in the area of their choice by choosing engineering electives. The Engineering Management program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria Engineering Management Programs.

You may choose to complete all the requirements for the degree in 4 years to 5 years depending on your high school preparedness, desired semester workload and motivation. Contact the EMGT department for further details.

COOPERATIVE EDUCATION PROGRAM (CO-OP)

Practical work experience (cooperative education or CO-OP) is an integral part of engineering management education at University of the Pacific. All students who are U.S. citizens are required to complete 32 units of CO-OP, which entails a seven month work period. Experience gained during CO-OP gives Pacific engineering management graduates a significant advantage when they seek employment after graduation.
